How to Add IP Camera on CamHi

1, Make sure camera is connected to router by cable or WiFi, also you can access camera on IE or our PC client software, then install app CamHi on your phone, app CamHi is both for Android and iPhone.

2, There are 3 ways to add IP camera on CamHi: .①Scan camera QR code, ②Search camera from LAN, ③Manual add by camera UID number

① Scan camera QR code: there is a QR code label on camera housing, scan this QR code.
